DFARS Discussion

■ **DFARS 204.7002 Policy**

- (a)** Use the uniform PII numbering system prescribed by this subpart for the solicitation/contract instruments described in 204.7003 and 204.7004.
- (b) Retain the basic PII number unchanged for the life of the instrument.**

U.S. AIR FORCE

Background Paper

- **To-Be process:**
 - **Award/Mod released in PD2.....it's GONE!**
 - **Electronic distribution (EDA/EDI)**
 - **Corrections: handled by modifications**
 - **Unusual circumstances necessitate use of systemic method**
 - **Controlled process - case by case basis**
- **Authority to issue scripts**
 - **Services**
- **Issues concerning script**
 - **Control**
 - **Procurement Integrity**
- **JRB aware of user issues**

- **Handed under the current Help Desk Agreement**
 - **System Created Duplicates**
 - **Incorrect Modification Numbers (bilateral or unilateral)**
 - **Dashes**
 - **Cancel Cancel**
 - **Other System Errors**
 - **PIIN displayed in wrong format**
 - **Different document numbers on different pages**
 - **Double P or A (e.g. PP0001 or AA0001)**
 - **Activity Address Number (UIC) disappears**
 - **Part of PIIN disappears**
 - **Orphaned data**

U.S. AIR FORCE

v5.0 - Background

- **v5.0 JRB requirements split into two CLINS for funding purposes:**
 - **P00032 (JULY 00) - FINAL “DELIVERY” (JUNE ‘01) - CLIN 3082**
 - **Non-Deployable**
 - **Re-Host v4.2 unchanged functionality**
 - **266/409 New Functional Requirements**
 - **Portion of Technical Requirements included**
 - **5 Build Releases (BR)**
 - **BR not defined in contract**
 - **AMS Defines with Delivery of BR**
 - **P0000? - CLIN 4080**
 - **Currently in Negotiations - Combine 3082/4080**
 - **Remaining v5.0 Functional Requirements**
 - **Remaining v5.0 Technical Requirements**

U.S. AIR FORCE

v5.0 - Roles/Duties

- **Clarify design issues with contractor personnel during the various stages of the design progression**
 - **Review Functional Design Documents specifications**
 - **Rigorous teaming schedule**
- **Execute hands-on scenarios with each new build release and provide documentation observations to the PCO**
 - **v5.0 contractually requires 5 builds with a final delivery containing the final complete product (CLIN 3082)**
 - **Each build introduces an increase in functionality from the previous build**
 - **Compare AMS BR notes to BR software**

U.S. AIR FORCE

v5.0 - Roles/Duties (continued)

- **Evaluate delivered BR software**
 - **Document “Issues/Comments/Concerns”**
 - **Track Resolution**
- **Assess overall progress towards meeting full requirements**

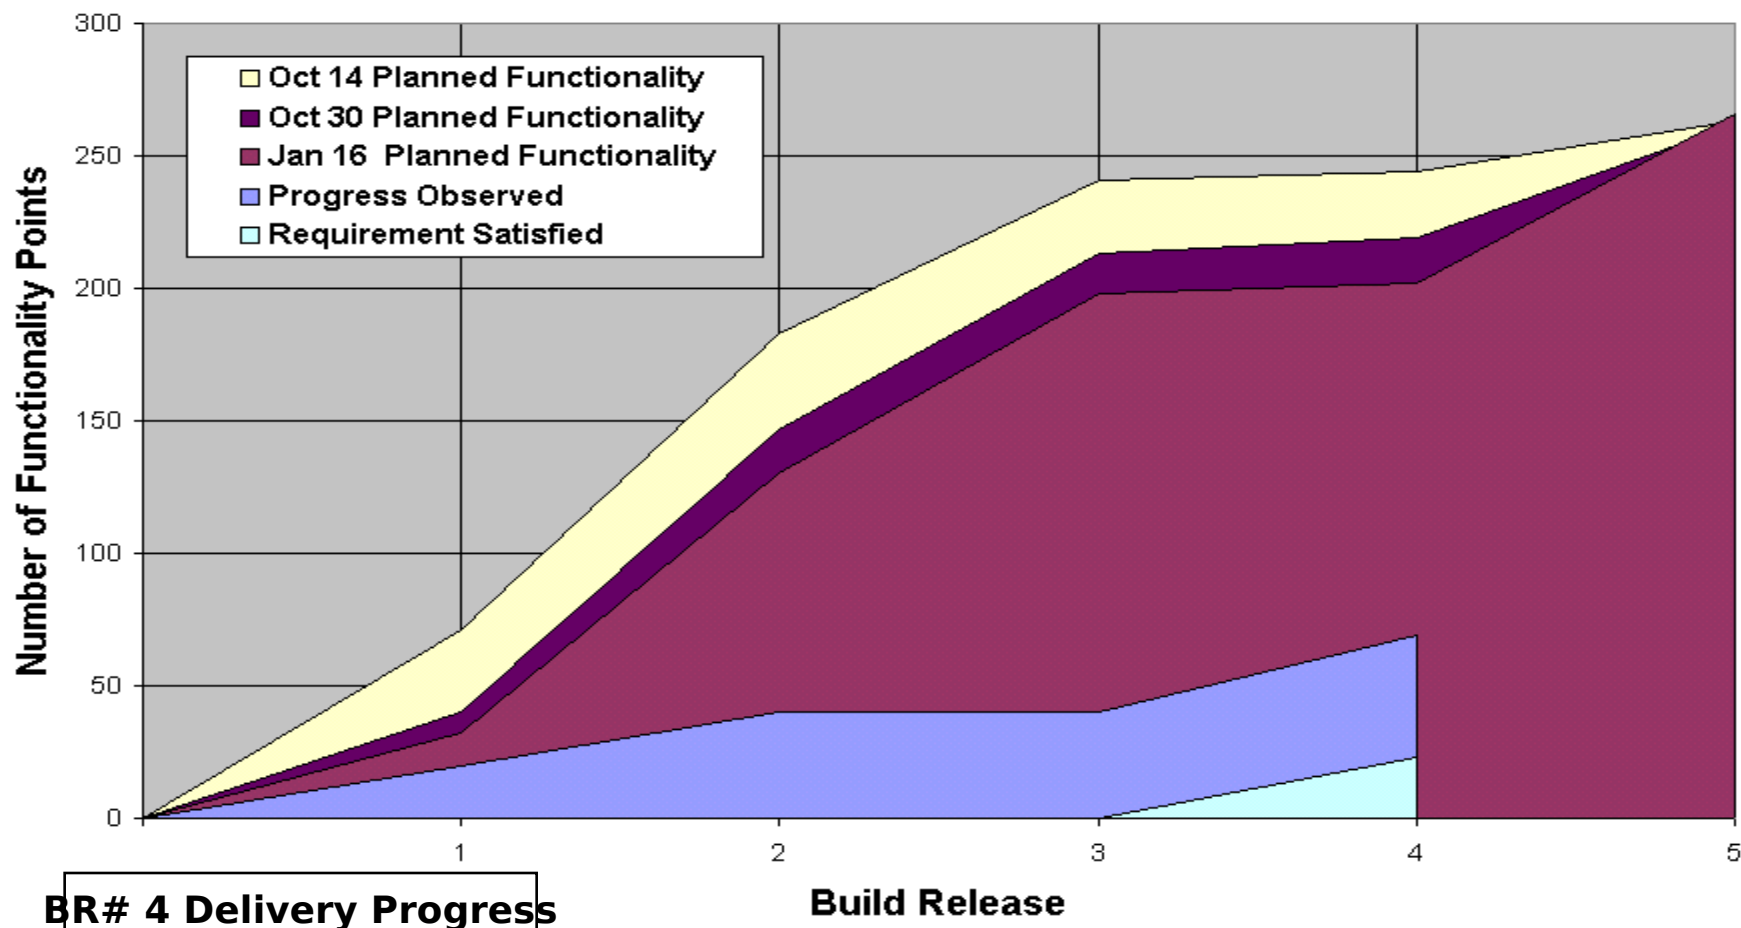

v5.0 - Roles/Duties (continued)

U.S. AIR FORCE

User Information - (continued)

Standard Procurement System (SPS)

SOFTWARE OBSERVATION REPORT (SOR) DATABASE (SOD)

The purpose of the Software Observation Report (SOR) Database is to act as a master repository for reports of observations made in using the Procurement Desktop Defense (PD2) software for the Standard Procurement System (SPS). The two primary sources for these SORs are as follows:

The SPS Requirements Board: Problems are forwarded from field users to component representatives and filtered through to the Requirements Board. The Requirements Board members examine the SORs and refine them to reflect "joint" requirements. These requirements are identified with the "RB" prefix numbers.
